

# USER INSTRUCTIONS

## Rokkiparkki - The underground parking facility in Jätkäsaari

### WELCOME TO ROKKIPARKKI

Rokkiparkki is the underground parking facility in Jätkäsaari, which is open to those who have reserved a parking space. Rokkiparkki offers parking spaces on two levels. The parking spaces are free for the users and cannot be reserved. To enter Rokkiparkki, drive down the ramp from Välimerenkatu. Pedestrians can enter the facility through six different doors that are clearly marked for drivers as well – this way you will always find the door closest to your destination. Rokkiparkki can be accessed with a separate personal identification, which opens the barriers automatically.

### 1 ENTRANCE (VÄLIMERENKATU 12)

There are two ways to enter the parking facility.

**1. Card identification:** If you have a valid identification card, you can use it to enter. The cards work with remotely read radio frequency technology. Keep the card in the car, visible to the reader device, and drive close to the barrier or roll-up door, whereupon the system recognizes the user and the door opens automatically. If necessary, the card can also be read by the reader on the post.

**2. Registration number:** If you register the registration number of your car with our customer service, the camera will recognize the car and open the doors automatically. You can register several registration numbers; however, only one of these can be inside the facility at any one time.

To enter Rokkiparkki, drive down the ramp and take the second exit at the roundabout, following the Rokkiparkki signs. Should any problems arise, you can contact customer service by intercom at the entrance and exit barriers.

Our customer service is available 24 hours a day.

## 2 PEDESTRIAN ENTRANCES

There are readers at the pedestrian doors. To go through, use the keypad to enter your personal PIN code, which consists of the last 6 digits of the series of numbers on the back of the identification card.

The pedestrian doors are marked with a colour, a letter describing the order of the doors, and the street address of the door in question.

## 3 PARKING SPACES

The parking spaces in Rokkiparkki are free. There are separately marked spaces for accessible parking and electric vehicle charging, as well as a car wash on level P2.

You can park on levels P1 and P2. From level P2, all pedestrian doors can be accessed. From level P1, there is direct access only to doors A, E and F.

There are public charging stations for electric vehicles in the parking facility. The price of energy is lower for contract customers. You can get a contract at the customer service.

The charging stations are operated in the same way as any public charging station. Check in at the charging stations as a Virta.fi customer or with the ID of another operator that is compatible with the Virta service. The charged energy will be added to the regular invoice for your electric vehicle. If necessary, register in advance at [virta.fi](http://virta.fi)

## 4 EXIT

You exit in the same way as you entered

## IDENTIFICATION

One parking permit only entitles you to one identification card. With the identification, you are entitled to parking only one vehicle at a time in the facility. The system will not let a vehicle enter if the identification connected to a parking permit is already in use by another vehicle in the facility. The same restrictions apply to both the code and the remotely read card.
